UNSAFE: The Truth Behind Everyday Chemicals

There are tens of thousands of chemicals in our air, water, and in the everyday products we use. They are largely unregulated and few are adequately tested for safety. They contribute to disease and are linked to conditions such as asthma, autism, ADHD, diabetes, cancers, infertility, cognitive disorders, obesity, reproductive disorders and birth defects. Earth Focus looks at endocrine disruptors, ubiquitous chemicals that affect development, metabolism, fertility and intelligence at extremely low doses and at what measures could be taken to better ensure public safety.

Unitarian Universalist Fellowship of Falmouth
840 Sandwich Road, East Falmouth, MA

May 21, 7–9 pm

A post-film panel discussion will be facilitated by Cheryl Osimo, Executive Director Massachusetts Breast Cancer Coalition and Co Founder Silent Spring Institute
